

ILLUMA-T

Integrated LCRD Low-Earth-Orbit User Modem and Amplifier Terminal

FUN FACT

The International Space Station is a home for astronauts in space. A laser communications system called ILLUMA-T will let astronauts download information faster.

ILLUMA-T

Integrated LCRD Low-Earth-Orbit User Modem and Amplifier Terminal

FUN FACT

ILLUMA-T will travel to the
International Space Station on a
SpaceX Falcon 9 rocket.

ILLUMA-T

Integrated LCRD Low-Earth-Orbit User Modem and Amplifier Terminal

FUN FACT

ILLUMA-T on the International Space Station will collect experiment data and send it through the Laser Communications Relay Demonstration (LCRD) over laser links!

ILLUMA-T

Integrated LCRD Low-Earth-Orbit User Modem and Amplifier Terminal

FUN FACT

LCRD and ILLUMA-T will work together, using invisible infrared light to send information from space to scientists on Earth.
